GNOME 3.36 Release Vide
Creative Brief
This video should play of
similar flat shaded style
to show the main release
animations which add humc
to the release announceme
Draft outline: Revisio
Voiceover)
Intro:
1. "The GNOME team is back with a fresh new 3.36 release. This version brings a substantial number of new features and design updates."
[Intro animation shows a few gnome developers typing in various locations (maybe a 4-way screen split, with 4 different locations). Globe expands in the middle of the 4 way split with word bubbles, representing discussion from all over the world]
Feature 1: Visual style improvements
2. "With every release, our goal is to provide a more polished, better looking and easier to use experience."
**3. "3.36 represents a major user experience
