@heyrahman

Our Company & Open Source

It started from a 'coincidence'...

HALAL TOURISM MAGAZINE

OTTOMAN[®]

SPECIAL EDITION

SEJARAH

ACEH & TURKI

[illegible]

He uses open source software only to do his
design & layout tasks.

Since the company management only know people who use proprietary softwares, they have difficulty to find someone to take over Mr. S' role.

One day, a friend of mine who knows I use open source software for graphic design, introduce me to the director of Ottoman Company.

...here I am!

They first hired me to do the graphic design stuff,
and now they promote me as general manager.

FOSS Used in Our Company

Graphic Design & Photo Retouch

Office Suite

The Benefits of Using FOSS in Our Company

Cost Effective

We don't need to spend much budget to buy softwares license or subscription.
(office suite, graphic design, photo retouch, and layouting softwares)

Worry-Free

We don't need to worry about our softwares legality.

Increase in Knowledge

The use of FOSS give us a better understanding about the common use of illegal software (due to lack of knowledge), the importance of open source software, or licenses in most thing from internet.

Thank you!

Any question? Have something to discuss?
